

PRAIRIE VIEW A&M UNIVERSITY

A Member of The Texas A&M University System

Prairie View A&M University encourages companies to support the Center of Excellence for Communication Systems Technology Research (CECSTR). The common goal of the Center is to continue providing and sharing information that will change current technology and reinvent trends in an evolving world-wide market.

The Center conducts comprehensive research in the selected aspects of communication systems, Wavelets and Wavelet Transforms, Compressed Sensing/Compressive Sampling Systems, DSP Solutions, Signal/Image/Video Processing, Mixed Signal Systems, Communication Control Systems and High Speed (Broadband) Communication Systems. CECSTR is inviting companies to join them in a collaboration that will be of mutual benefit to the university as well as partnering companies.

What does a company gain from its involvement in the CECSTR program?

- Relevant Research to your company's current and future needs,
- Interaction and networking with top scientists and researchers,
- Assistance in remaining competitive in today's global market,
- Access to students for internships, coops, and permanent hire, and
- Enhance curriculum that will ensure a well educated workforce for your industry.

In turn, participating companies enable the Center of Excellence for Communication Systems Technology Research to fund:

- Research projects,
- Undergraduate and graduate assistantships, and
- Technology development.

Please contact Dr. Willie F. Trotty, Vice President for Research and Development, at (936) 261-1550 or Dr. Cajetan M. Akujuobi, Director, Center of Excellence for Communication Systems Technology Research at (936) 261-9990 to further discuss opportunities and/or to schedule a visit to our campus.

Sincerely,

Willie F. Trotty, PhD
Vice President for Research and Development
